Space Travel: Exploring Beyond Our Solar System In recent years, astronauts have achieved remarkable feats in space exploration. They've conducted missions to the Moon and inhabited space stations orbiting our planet. While venturing to other planets like Mars remains a future goal, scientists are already planning for extended space journeys that may last for several years. One of the biggest challenges in space travel is ensuring a sustainable food supply for astronauts during their missions. Carrying enough fresh food for extended periods is costly and impractical. Therefore, space agencies have developed innovative solutions, such as growing vegetables onboard space stations. These space gardens provide astronauts with fresh produce, enhancing both their physical health and psychological well-being. Additionally, researchers are exploring ways to create synthetic food substitutes using advanced technology. These alternatives aim to replicate the taste and texture of traditional foods like meat and cheese while being easier to transport and store in space.

21. What has been one of the remarkable achievements of astronauts in recent years?
 - A. Traveling to Mars
 - B. Conducting missions to the Moon
 - C. Inhabiting space stations around Saturn
 - D. Exploring distant galaxies
22. Why is carrying fresh food on space missions considered impractical?
 - A. It spoils quickly
 - B. It is too heavy
 - C. It is too expensive
 - D. It takes up too much space
23. How do space gardens benefit astronauts?
 - A. They provide entertainment
 - B. They enhance physical health
 - C. They create artificial gravity
 - D. They improve navigation systems
24. What is one solution mentioned in the text for providing food during space missions?
 - A. Growing vegetables onboard spacecraft
 - B. Sending regular food deliveries from Earth
 - C. Hunting for food on distant planets
 - D. Using advanced technology to produce synthetic food
25. What is the purpose of creating synthetic food substitutes for space travel?
 - A. To reduce costs
 - B. To entertain astronauts
 - C. To replicate traditional food flavors
 - D. To conserve water resources
